

## **CS-SQL-ToolKIT**

**SQL Productivity Tools: Simplify and Streamline Your SQL Table Management.**

### **CS-SQL-COMPARE**

CS-SQL-COMPARE is an effective way to dynamically compare NonStop SQL tables.

- Compare your actual database to a replicated database
- Compare active databases

### **CS-FTP-DB**

FTP-DB allows you to directly transfer to or from NonStop™ SQL tables to any other system in your network including workstations and PCs.

- Streams data for quick and easy transfers
- Use on “Hot Tables”

### **CS-TP-SPY**

TP-SPY is a tool designed to provide transaction analysis for your SQL databases.

- Flexible querying of TMF transactions for detailed analysis
- Provides statistics and contents for analysis
